The World of Wheat.

By H. G. L. Strange, Director Research Department,
Searle Grain Co. Ltd.

Spring now has come, and the thoughts of farmers turn to the fields which are to provide the family living.

Implements will be repaired and cleaned, the seeder receiving particular attention. Wise farmers ere this have made their arrangements for good seed, and are now considering the problem of treating against smut.

Seed treatment is as old as history. Virgil in his immortal poem on farming "The Georgics" written about 35 B.C., tells us

'Off have I seen a sower dress his seed
With soda and black lees of olive oil.'

But the modern farmer has the choice of several better methods.

The old standby Formaldehyde is the cheapest, but must be made up of exactly the correct strength, else the germination of the seed may be damaged.

The new mercurial dusts, Ceresan and Leytosan, are becoming increasingly popular. While more expensive, they have several advantages over Formaldehyde. In the first place the dusts control not only stinking smut, but also to a great extent root rot bacteria, thus promoting a more generous and healthier rooting system, which in turn helps to keep weeds down; all tending, therefore, to bring about higher yields.

Secondly, when Leytosan or Ceresan is used, seed can be treated several weeks before sowing, thus making the farmer's work easier and less hurried.

Sporting Notes

The first touch of suitable weather has started the local baseball boys off on their favorite pastime. Several practices for the Senior team were held last week, with a big rally of players at the local diamond on Saturday evening. With this early start, and everyone meaning business, this promises to be one of baseball's best seasons, locally.

The Executive of Spruce Grove Ball Club have just outlined an ambitious scheme to augment the membership roll of the club. The plan is to issue membership slips each month, each ticket being numbered. There is to be a drawing every month, with valuable prizes to the lucky holders of the winning tickets. The enterprise, it is hoped, will provide funds on which the club will operate during the coming season.

With the big May 24th Sports Day less than five weeks ahead, athletes here and in the other school units of the inspectorate have started their training activities. The events on the coming sports day, it is predicted, will outdo the proceedings of last year in several respects, both in the number of competitors and in the larger list of prizes to be offered. The Teachers' committee which has the matter in hand are now said to be working on the prize list and the competitive events, and we may be hearing from them following their next meeting on Wednesday, May 11th.

Coming, Saturday Night.

Coming to Kelly's Hall on Saturday evening next will be another realistic drama of the Western plains. Big Boy Williams will be seen in "Thunder Over Texas," said to be one of the best of its kind. The added feature will be "War in China," with comedy, cartoon, and an up-to-date news reel.

The Radio Shop.

The premises on Main St. recently occupied by Leonard Bednarski as a lunch counter, has been re-opened as a Radio repair shop by Henry Trapp. Your electrical needs will be attended to promptly. A full line of batteries will be kept in stock. Sportsmen will find their needs will receive prompt attention, as Henry is agent for one of the best lines of sporting equipment.

Slight Misunderstanding.

"I've asked Mr and Mrs Jenkins to dinner at 7, Jane, but I think we'll give them a quarter of an hour's grace," said the mistress.

"Well, ma'am," Jane replied, "I'm a little religious myself, but I think that's rather overdoing it."

Over Four Hundred Miles To Be Built To Complete Trans-Canada Highway

Ignoring the myriad detours which mark new construction on the Trans-Canada highway, there remain about five years of intensive construction and the expenditure of approximately \$30,000,000, over 400 miles of road to be built. It will cost about \$20,000,000 and can scarcely be completed before 1941. When that is done and the route opened to through traffic it will probably be given the designation No. 1. At least in several provinces this number has been reserved for that purpose.

Over a course 1,000 miles in length from Sydney, N.S., to Victoria, B.C., there are three gaps in the main stretch of Canada. The first is a 60-mile stretch in Nova Scotia. The second is the major one, 270 miles in the Lake Superior section of Ontario. The third is a 78-mile stretch around the Big Bend of the Columbia river in British Columbia. The Nova Scotia link will be forged within two years. Construction in the Rockies is more difficult but here, too, the Dominion's program calls for completion in two years.

The Lake Superior link is the only one which will take an indeterminate length of time. Five years would seem to be an optimistic estimate of the time required to connect eastern and western Canada by an all-weather motor highway.

Construction has been done almost entirely by the provinces and has been encouraged by federal grants-in-aid amounting to \$54,651,132.78 has been spent by Ottawa and a like amount by the provinces.

In addition, upward of \$1,000,000 has been spent by the Dominion in northwestern Ontario unemployment relief camps. These men did road work. Further sums have been spent by the Dominion on the sections of the highway which are in Alberta and B.C. national parks.

Much of the new highway, built or improved in the past five years, is still rough. This class of road comprises, chiefly, the stretch through new Ontario.

Expenditures have been at the rate of about \$6,000,000 per year. In the future, the totals are likely to be smaller, with some \$20,000,000 being spent in the next five years.

By provinces, the expenditures since 1930 have been:

Prince Edward Island	\$ 265,021.30
Nova Scotia	1,525,420.16
New Brunswick	971,350.02
Quebec	3,756.28
Ontario	10,239,072.89
Manitoba	616,251.86
Saskatchewan	10,490.02
Alberta	295,344.83
British Columbia	426,425.37

Pedestrian's Liability

Motorist in England Receives Damages From a Pedestrian
When a motorist recovers damages from a pedestrian, it is news. Such an incident is reported from England where an Ipswich motorist has been required to pay for the damage done when he swerved to avoid a pedestrian, but has been held to be entitled to compensation from the pedestrian.

The judgment apparently recognizes the primary responsibility of the motorist for any damage which his car may do. It is reasonable that any one who undertakes to drive on a public highway should assume liability for any damage which may result from the operation of his car.

But the unusual feature of the judgment is that it recognizes that a motorist, who is driving carefully and is suddenly confronted by an emergency created by the carelessness of a pedestrian, is entitled to compensation if in swerving to avoid that danger he runs into other danger.—Toronto Telegram.

Had To Have Proof

At New York's first auto show in 1900 a circular track was built in the old Madison Square Garden for the cars to whirl around on at the rate of twelve miles an hour—to prove to pop-eyed prospects that the horseless carriages could actually move under their own power.

Australia expects to produce 20,000 tons of dried currants this year.

Film Version Of The Bible

A Three-Hour Film Of The Bible Is Project Of British Company

A British film company, Vogue Films, greatly daring, at a time when our national production seems to be at its lowest ebb, propose to produce a film version of the Bible, which will cost \$400,000, employ 10,000 people, take a year to make, and occupy something like three hours of running time on the screen.

Vogue Films, it seems, are not only ambitious. Undeterred by the censor's ban, which forbids the reproduction of the figure of Christ on the screen, they intend to tackle both Old and New Testaments. The film, they say, will be in color. It will be made by three different directors. It will be treated in sections by a number of leading writers. It will be played by famous actors from a variety of countries. It will be circulated to the ordinary commercial theatres as a single feature, running in all to something like 15,000 feet.

Old Testament history, when tactfully done, has never given our masses any trouble. The story of Moses and the crossing of the Red Sea was the highlight of the silent film "The Ten Commandments." New Testament stories have been shown from time to time without a censor's certificate, by permission of the L.C.C. and various local watch committees. The most outstanding examples of this kind were Cecil B. de Mille's "King of Kings," which was given special Easter week showings in the latter days of silent pictures.

In almost all cases of religious films passed for exhibition by local authorities certain rules of exhibition apply. These include, amongst others, no pictorial posters; no mention of the names of the actors; no smoking in the auditorium; musical accompaniment to be of a religious character; and no other film to be shown in the same program.

It will be interesting to see how the newly projected Bible film will meet these various conditions.

The Bible is an untapped treasury of stories dramatic, exciting, romantic, and lyrical, for the serious film research student. But it would be unfair to pretend that other producers have not already come close to the idea, and been forced, for various reasons, to abandon it. Korda's projected "King of the Jews," from which Victor Sjostrom, was the last case in point.—London Observer.

Time Moves On

Grandmothers Of Olden Days And Later Models

If you are one who remembers Grandma as a sweetly wrinkled old lady in lace cap who sat by the fire and knitted, your view of her when she was young is a far cry from the one you have now. The activities of a Grandmother's Club recently organized in Chicago will give you an idea what a stream-lined woman the contemporary grandma is.

This club boasts 39 grandmothers. One is a candidate for mayor. Another employs 300 people in her candy factory. A third heads the B. and O. women's department. A fourth manages a \$2,000,000 estate. A fifth (with 13 grandchildren) manages a gravel pit. A sixth, 72, has sold insurance for a living since she was 54. And so on.

Like younger folks, these grandmas play as well as work. Listed among their recreations are horse-back riding, swimming, bowling, fishing, hiking and gardening.

Rocking chairs? Why, bless your soul, leave them for the third- and decrepit younger generations!—Stratford Beacon-Herald.

Protectorate In Arabia

On the southern shores of Arabia, east of Aden, Great Britain is establishing an undeclared protectorate over Hadramaut. The independence of Hadramaut is formally recognised. Agreements have been made under which the Royal Air Force will be called in when necessary to impose order.

Women As Travellers

Are Very Practical And Tip Only If They Get Service

Women—mostly teachers and nurses—travel most on railways. A. A. Gardiner told the Westmount Women's Club in Montreal. Mr. Gardiner was quoting data received from railway men in Canada and the United States.

The element of romance in travel probably was responsible in part and emancipation also was a factor. "Bargain" fares were a great appeal to women indifferent when they were merely labelled "low fares." And women all-expense fares, since they want to know just what a trip is going to cost.

Women show more practical sense than men in tipping—more fair play, the speaker said. They tip, he suggested, to ensure promptitude or for service—and when a woman doesn't receive service she doesn't tip. Women, too, are more given to buying transportation from advertising. Also, they seem to feel they will enjoy a trip in ratio to the number of questions they ask the railway people. A side trip included in a ticket has an irresistible appeal.

When the family is taking a trip the wife makes 90 per cent. of the decisions and does 75 to 75 per cent. of the spending. In many cases it is the girl who makes the inquiries about the honeymoon trip. The train staff always recognizes a honeymoon couple—because both are wearing new shoes.

Women have better travel sense when it comes to baggage—and their small overnight bags are a joy to the porters.

In one respect men are somewhat superior to women as travellers, said the speaker, referring to the feminine penchant for monopolizing all the dressing room space and keeping it for a long period.

When a man makes a complaint he says he is speaking for his wife; the women "winked" you should know about this," but she does not want the offender to lose his job as a result.

Like men, women leave all sorts of things on trains—but never in the history of travelling has a compact been left behind.

Should Be Renovated

Agitation Started Against New Brunswick's Old Debt Law

Plans are underway to renovate New Brunswick's antiquated debt law, long ridiculed by lawyers and social workers as the one on which creditors so hounded Dickens's immortal Micawber in "David Copperfield."

Amendments to the act, said to be the only one in existence in the civilized world, were stymied to permit legislative officials to attend the coronation last spring.

Agitation against the statute has been underway for the past 20 years, sponsored by the New Brunswick Barriesters' Association.

The clause under attack permits the creditor not only to obtain an execution against the goods of the debtor, but to obtain an execution against his body also. In St. John, largest city in the province, an average of six persons are jailed monthly for debts.

Cute Kittens Have Many Uses

PATTERN 6105

Brighten your lines quickly with these appealing kitten motifs—mainly in easy cross-stitch with lazy-daisy stitch. Pattern 6105 contains a transfer pattern of 2 motifs 8 1/2 x 9 1/2 inches, 2 motifs 8 x 8 1/2 inches, 2 and 2 reverse motifs 5 1/2 x 6 1/2 inches and 4 motifs 2 1/2 x 1 1/2 inches of stitches; materials needed; color suggestions.

To obtain this pattern send 20 cents in coin (stamps cannot be accepted) to Household Arts Dept., Winnipeg: Newspaper Union, 376 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Rust-Resistant Wheats Have Overcome Menace Caused by Barberry Bush

The associate committee on field crop diseases of the National Research Council of Canada finds rust-resistant wheats and oats may eventually obviate the necessity for destruction of barberry and buckthorn bushes.

The committee, in session at Winnipeg, has studied causes and control of rust, smuts, root-rot and other plant diseases. While the perfect wheat that can overcome all diseases remains to be developed, the fact rust-resistant wheats have overcome the menace of barberry bush rust-producing qualities was an outstanding development.

The associate committee on grain research announced approval of two new rust-resistant wheats, known only as "Rust Laboratory RL1097 and 9751 or Crop Test 118 and 124 wheats," pronounced by Dr. C. H. Goulden, the producer, as resistant to leaf rust, covered smut and stem rust.

Dr. Goulden, chief cerealist specialist of the Dominion rust laboratory at Winnipeg, explained rust develops through the barberry bush and complete elimination of barberry bush growth in North America would probably eliminate rust troubles of Canadian wheat farmers.

He said the barberry bush grows in the Maritime provinces and southern sections of United States. Spores of rust float through the air and eventually settle in Western Canada.

Plant breeders reported on varieties of rust-resistant wheat and oat types and said "definite progress is being made in development of varieties that are resistant to other diseases."

The grains which show resistance to one or more diseases are being used as parents in order to produce resistant strains.

Plans are underway to develop wheat resistant to the sawfly by cross-breeding to produce a solid-stem wheat. Solid-stem wheats, as being rarely in North America, are being cross-bred with more common wheats.

The sawfly lays eggs in stems of ordinary wheat and the larva or worm bores down the stem. Thus the plant breaks under pressure of wind and fallen wheat fields are practically impossible to harvest profitably.

The committee found that mercuric dust treatments, applying chemical dust to seed wheats, was a feasible protection against smut which exists in the seed spores. The most practical mercuric dust mixer known is a home-made machine resembling a churn but a perfect dusting machine would be welcomed.

While dust-treatment of wheat seeds would protect against smut, plant breeders say strains must be developed entirely resistant to smut. Some grains already produced are partially resistant. The varieties known but not named by the committee.

Work on root-rot diseases has undergone a co-operative study by plant pathologist and soil microbiologists, the committee stated.

"Definite progress toward eliminating this disease has been made but more work must be done before complete control of root-rot is obtained."

Sawfly damage, while not as sweeping as rust, takes a heavy toll from the wheat fields yearly. In 1935 the Saskatchewan loss was officially estimated at more than \$3,000,000.

The emerging grub, hatched from sawfly eggs, saws a ring around wheat stalks, plugs the stub with sawdust and spends the winter just above the root.

The committee stated parent material is available that is immune to sawfly attacks.

Canadian farmers "should beware of mis-statements about the mailing quality of barley varieties," the committee announced.

Only six types of barley are eligible for the mailing grades, the committee's statement said. They are "Ontario Agriculture College 21, Manchurian, Mensury, Mensury Ottawa 60, Carletons and Peatland barley."

After considering the mailing data, agronomic characteristics and the purity of available seed supplies, the committee recommended growing of only O.A.C. 21 and Mensury Ottawas 60 for mailing purposes.

Envoys' Question Answered

Reason World Not Happy Over Austrian Situation

Dr. Dieckhoff, the German Ambassador, was here the other day and made a speech. When he touched on Austria he asked why the happiness of two Germanic peoples at coming together should not be shared by the whole world. Perhaps we can answer his question rather briefly.

A girl who works in our office was around here all day in tears, and we finally asked her what was the matter. It turned out that she had once lived in Vienna, where she had a job, and that while there she had boarded with a Jewish family of whom she became very fond. She heard news of them through a daughter of the family who is now in this country. The household had been entered by troopers and searched, and the girl's mother and sister are now dead—whether by their own hand or by the hand of the troopers is not yet certain. The son-in-law is in a camp where. This will answer the Ambassador's question.—The New Yorker.

For National Fitness

British Government Will Link Physical Culture Movement With Cooking

The British government's national fitness campaign is going to effect not only muscular but mental. Much of the physical unfitness of the English people is attributed to unsuitable and badly cooked food. The ministry of health and the board of education are considering how the better and wider teaching of cookery can be linked with the physical culture movement.

No detailed plan has yet been produced, but it is anticipated that steps will be taken to encourage the provision of more evening cookery centres and the better patronage of those already in existence.

Many girls now go from school to work in shops, offices, or factories. By the time they are married they have forgotten most of what they learned about cooking and the dietetics at school. It is this gap between school life and marriage that the ministry of health and the board of trade will attempt to bridge.

Byron Was Superstitious

Byron was extremely superstitious. He firmly believed in lucky and unlucky days; disliked undertaking anything on a Friday; avoided being helped to salt at table; and if he spilled salt or oil, let bread fall or broke a mirror, he knew something terrible was going to happen.

Owing to new sources of supply, mahogany is now available as cheaply as oak and is returning to popular favor as a furnishing medium.

WATER-COLOUR TINTS FOR RESTFUL LIGHTING

"CREATE ROOMS—FREE from EYE STRAIN" says "Alabastine Al"

"My customers prefer the water-colour tints of ALABASTINE. The soft, non-glare finish is easy on the eyes. It's inexpensive, too!"

Alabastine

THE NATIONAL WALL COATING

WORLD HAPPENINGS BRIEFLY TOLD

Imperial Airways officials said inauguration of trans-Atlantic air service this summer would be impossible due to a lack of equipment.

President Roosevelt has removed Austria from the list of nations receiving preferential tariff treatment from the United States.

Starlings, a major Ontario pest, are coming West in increasing numbers, bird fanciers report. Whether they would survive a western winter is not known.

An Arab shot and killed Squadron Leader Eric Hudson of the Royal Air Force at the Haneh aerodrome in Palestine, according to reports received at Cairo.

A Canadian delegation of ex-servicemen, making their annual pilgrimage to the Artois battlefield, paid homage to Canadians who fell during the battle of Artois in 1915.

Canada was the largest purchaser of United States war supplies in March, say figures issued by the State Department. Canada imported \$1,194,168 worth of war materials, mostly aircraft.

British Columbia will erect a \$100,000 building in Vancouver as an auto testing center. When completed next fall, a driver may get his driver's and car license, have his driving ability and car tested in one building.

The Kazan newspaper Red Tartar reported the execution of seven former officials of the commissariat of agriculture in the Tartar republic. It gave the charges as wrecking of livestock breeding.

Herbert Hollic-Kenyon, Winnipeg flyer and chief aide to Sir Hubert Wilkins during the recently abandoned search for the six missing Soviet flyers, said no further efforts to find them would be made from the North American continent.

German Ambassador

Herbert von Dirksen To Succeed Von Ribbentrop In London
Chancellor Hitler has named Herbert von Dirksen, former ambassador to Japan, as German ambassador to Great Britain, succeeding Joachim von Ribbentrop, now German foreign minister.

Hans von Mackensen, state secretary to the foreign office, was appointed ambassador to Italy, succeeding Ulrich von Hassell, recalled in Hitler's shake-up of the diplomatic service in February.

Dr. Ernest Woermann, counselor at the London embassy, was called back to Berlin to become a foreign under-secretary. The military attaché at Tokyo, Major-General E. Ott, became ambassador to Japan.

Count von Welzuecker, political expert in the foreign ministry, was elevated to von Mackensen's post.

Theodor Kordt, a legation counselor in the diplomatic service, was appointed to replace Dr. Woermann in London.

"The strongest wind won't blow this powder from your face," says a beauty products advertisement. But it only takes a tiny puff to put it there.

One of the most cunning of all the wolf tribe, the coyote, shuns traps and poison, and thrives on land opened up by the white man's axe.

A hamlet isn't a hamlet legally until it has a cook, a churn, a bull, a cat, a herdman, a kiln and a plow, according to an old Welsh law.

Gardening

A brown or green-stained window box overflowing with gaily blooming flowers is easily produced. This sort of gardening is highly intensive and so a very rich soil should be used, and in addition a fairly frequent application of chemical fertilizer during the season. The box must be of fair depth, at least seven inches of soil being available. Being exposed on all sides to drying winds, a thorough soaking once a day is advised.

There must be holes in the bottom of the box to provide drainage, and also a layer of gravel, cinders, broken crockery or similar material for the same purpose. Along the front, trailing Nasturtiums, German Ivy, Lobelia, Alyssum and similar plants are put in, with Petunias, Ageratums, Begonias, Ferns, Geraniums and any other plants especially recommended for this purpose. The same treatment should be provided until the plants get established. The same treatment and planting materials will be used with hanging pots.

Tender vegetables are those which have been grown quickly. Especially with such things as radish, carrots and beets, in slow growth disastrous as the roots become woody and filled with objectionable fibres. But this rule also applies to those things used for salads. On this account experts advise pushing growth with frequent cultivation, which in addition to checking weeds also conserves moisture. Cultivation alone will often keep the vegetables going through a dry spell but, of course, a few pails of water or an hour or two with the hose at this time will lend further aid. Where the supply of water is not as convenient as it might be, it is a good plan, in laying out the garden, to plant those things most in need of extra moisture, such as radish, lettuce and celery, closest to the pump. Fertilizer is another way of hurrying growth and therefore assuring vegetables of the highest quality.

When an abundance of flowers for bouquets are wanted, experienced gardeners often grow these in a special place. Usually a portion of the vegetable patch or a row at the back may be reserved for this purpose. Some well designed beds of mixed annuals are spaced so that many flowers are picked and then again there are certain things like sweet peas, for instance, that have little attractive foliage but beautiful blooms.

Third largest of the seas of the world, Bering Sea has an average depth of only 900 feet.

TOT'S FROCK OFFERS TWO VERSIONS! By Anne Adams

Just right for a small girl to wear for everyday or dress-up is this delightful young frock! Miss "Two to Ten" will certainly be proud of this fetching style—and Mother will be pleased at the ease with which she can make up Pattern 4752. Do notice the neat panel, brief sleeves, Peter Pan collar, and two little pockets! All this youthful flattery is accentuated by dainty bows and ruffle trimming! Make young Mary-Anne a second version, too—with colorful tie-dye and a simple neckline. For fabric, chambray or dimity would prove dainty—while awns would serve beautifully for dress-up.

Pattern 4752 is available in children's sizes 2, 4, 6, 8 and 10. Size 6 takes 2½ yards 36 inch fabric and 4½ yards lace edging. Illustrated step-by-step sewing instructions. Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

Making Clock Modern

A turret clock near the main entrance to the Port of London Authority's Cutler-street warehouses, made by John Thwaites, of Clerkenwell, in 1891, is being fitted with a small electric motor to replace the old weights and pulley mechanism.

Canadian merchandise imported into Northern Rhodesia in 1936 to the value of over \$300,000, included among other items condensed milk, agricultural machinery and preserved vegetables.

FLIN FLON

"The Story of Its Finding and Position To-day"

By FRATT RUHN

THE VALUE OF FLIN FLON TO MANITOBA AND SASKATCHEWAN

Remember we found that merely to put the mine into production took thirty millions of dollars, much of which was put into circulation in the two provinces in the shape of wages and purchases of supplies.

To-day the mine employs 1,720 people, and remarkable as it is, true, over 640 of these are from Manitoba and Saskatchewan, with 280 more from other parts of Canada, and 243 from the British Empire (other than Canada). This makes over 75.5 of all employees recorded as British subjects. Of the total staff nearly 1,000 are married, and that accounts for the splendid town, nearly 7,000, that has grown up, equipped with schools, community halls, and every known organization such as Elks, Kiwanis, Rotary, Reg'lar Fellers', Masons, etc., etc.

Mining development on a sound scale thus means attraction of capital and steady payrolls. It's a backbone to the agricultural sections of the province and provides a market, increasingly important, for the farm produce.

I just ran across a note clipped from a business paper in 1928, which shows another angle to what Flin Flon meant to Manitoba at that time. It reads as follows:

"What mine means to the country at large was vividly portrayed in 1927 by the simple announcement that 'Canada Cement Company' would make a million dollar addition to their Winnipeg plant. The money would come from the Flin Flon Mine and Power Plant."

Remember, too, that the distance from Flin Flon, Manitoba, to Rouyn, Que., is greater than half way between the Atlantic and Pacific ocean and that this field contains almost every metal known to man. What wonderful possibilities there are! And ever since 1930 the Flin Flon has been turning out millions of dollars in copper, zinc, gold and silver and paying out millions in wages, for supplies and taxes to both provinces, and the Dominion.

Doctors Short Lived

Ministers, Judges And Educators Seem To Be In Preferred Class

In New York City it has been found that retired public school teachers live so much longer than anticipated under a salary pension schedule of eleven years ago that the contributory levies will have to be much increased. Ministers, judges and educators seem to be in the preferred longevity class whereas doctors, who of all others should best know the health rules, have a low expectancy rating—Brantford Express.

Customer: "I've come back to buy the car I was looking at yesterday. Salesman: "Fine. Now tell me what was the one dominating thing that made you decide to buy this car?" Customer: "My wife."

Health LEAGUE OF CANADA presents TOPICS OF VITAL INTEREST

By DR. J. W. S. McCULLOUGH

Editorial Note: Readers desiring the complete set of Dr. McCullough's cancer articles at once may secure same by writing for The Health League of Canada, 105 Bond St., Toronto, Ont.

SUNDAY SCHOOL LESSON

APRIL 24

RECEIVING VISION FOR SERVICE

Golden text: This is my beloved Son; ye hear him. Mark 9:7.
Lesson: Mark 9:2-10.
Devotional reading: Hebrews 1:1-9.

Explanations And Comments

The Transfiguration, Mark 9:1-8. About six days after Peter's avowal of Christ, and Jesus' announcement of His coming crucifixion, Jesus took three favored disciples, Peter, James and John, and ascended a high mountain where they could be "apart themselves." Dr. A. B. Bruce reminds us that the Gospel historians are not wont to be so careful in their indication of time, and this minute accuracy here signifies in effect: "While the foregoing communications and discourses concerning the cross were fresh in the thought of all the wondrous events we are now about to relate took place." The date is, in fact, "A fingerpost pointing back to the conversation on the passion and saying. If you desire to understand what follows, remember what went before."

There on the mount Jesus was transfigured before them. The fashion of his countenance was altered (Luke 9:29); his face did shine as the sun (Matthew 17:2). Jesus had been praying, Luke tells us. John G. Paton in his autobiography speaks of the wonder awe with which he and his brother would notice the beautiful light on their father's face as he appeared after his time of seclusion when he had been talking with God; and you recall that the face of Moses shone after he had been in communion with God on Mount Sinai. We can readily understand that Jesus would be awed in spirit, a new light would shine from his face, and his whole aspect would be changed after he opened in prayer. Was it Matthew, shining upon him from within, or was it inner glory shining through the disciples saw—who shall tell? His very garments glistered, whiter than any fuller could make them. (A fuller is one who fulles, thickens, by mottling, bleaching and pressing cloth.)

While they were speaking there came a cloud that overshadowed them, and a voice from the cloud was heard proclaiming, "This is my beloved Son; hear ye him."

Trade Representative

South Africa The First Overseas Dominions To Name Commissioner For Canada

The Union of South Africa will have an accredited representative in Canada, it is learned. The position will be substantially the same as that of high commissioner.

Announcement of the creation of this post with D. de Waal Meyer, South African trade commissioner now in Montreal, as the first accredited representative, was made in Pretoria, the department of external affairs at Ottawa added.

South Africa by this announcement became the first overseas dominion to name a representative of its government to the government of a sister dominion.

Queen Mary Visits Museum

Asked To See Regalia Worn By Prince Of Wales

For a moment Queen Mary stood before the regalia which her eldest son, the Duke of Windsor, wore when he became the Prince of Wales.

Visiting the Welsh national museum, the Queen Mother asked especially to see the purple velvet and ermine robe with gold chaplet, sword, verge and ring in which Edward was invested in 1911 at Carnarvon.

She looked in silence, then turned away.

One of the most ingenious methods of pilot training in the history of aviation has been installed by the Trans Canada Air Lines, Winnipeg, for the training of their pilot personnel. It is the "Link Trainer" and resembles a miniature plane, but contains all the dials and gadgets necessary to get the pilot's fullest reaction to instrument and beam flying. Every pilot in the service will undergo periodical and regular sessions in the Link Trainer. Picture No. 1 shows the Link Trainer and the hood which folds down over the pilot's head. No. 2 shows the pilot seated at the controls with his head phone ready to catch the radio beam signals. No. 3 shows the operator watching the mechanical "crab" which faithfully records on a chart every movement the pilot makes in his "trip" over any specified territory. Through the telephone the instructor can check quickly with the pilot. In the centre is the Trans Canada Air Lines "Flying Maple Leaf" which appears on the nose of all company machines.

WIDER POWERS FOR DALADIER IN FRENCH CRISIS

Paris.—The chamber of deputies, by a vote of 506-12, approved Premier Edouard Daladier's request for power to govern France by cabinet decree for three months.

The bill was presented to parliament as an emergency measure to enable the new government to cope with troublesome financial and labor problems and was approved.

The chamber gave the premier a 570-5 vote of confidence, while the senate greeted his outline of policy with almost unanimous applause.

Floitation of a 15,000,000,000 franc (about \$465,000,000) national defence loan is chief among projected measures of the government, drawn from moderate left and centre parties of parliament.

This power, as the bill now stands, will lapse automatically July 31, or on any previous date on which parliament may decide to adjourn its present regular session. Whatever decrees are enacted will take effect immediately, but must be ratified by parliament before Dec. 31.

Daladier also made a big start in settling labor disputes which at their height found 160,000 strikers occupying France's key national defence factories.

This number was reduced to 140,000 when an arbitrator appointed by the government sent 20,000 strikers in aviation plants back to work. Further progress was achieved when employers and "stay-in" strikers in the plants still deadlocked agreed to submit their differences to arbitration.

Before the confidence vote, Daladier advised parliament the destiny of France was at stake and insisted that in the face of returned Europe every one of France's internal weaknesses undermined the nation's security.

The first reaction was announced by Jacques Duclos, secretary of the Communist party, who said strikers in the nationalized aviation factories—numbering about 20,000—were ready to return to work. Duclos is a deputy.

Duclos' announcement was confirmed by the minister of air, Guy Lachambre, who said the strikers agreed to work 45 instead of 40 hours a week, with an increase in pay of 75 centimes (about two cents) an hour. They originally demanded an increase of two francs an hour (about six cents).

The workers' decision was made known after Daladier stated in the chamber the government would take steps to keep the armament factories in operation, regardless of strikes.

Deputies considered the premier's statement as a warning he would mobilize strikers and send them back to work as soldiers, a status which would make quitting equivalent to desertion.

Social Reforms For Egypt

Government Has Program That Will Benefit The Peasants
Cairo, Egypt.—The King Farouk told the new parliament an Anglo-Italian agreement would be the "surest guarantee of peace."

The speech from the throne was delivered by Premier Mohammed Mahmoud Pasha. It said the government's first duty is to provide Egypt with adequate defenses and promised the air force would be reinforced rapidly. It also outlined a social reform program to raise the standard of living of the Egyptian peasant.

Royalty Watches Mimic Battle
Aldershot, England.—The King and Queen watched the mechanized army demonstrate its firepower and mobility in a mimic battle here. They gazed through a haze of smoke and dust, thrown up by exploding shells, at the array of tanks, armored cars, field and machine guns engaged in the manoeuvres.

Cuba Lovers Tariff To Canada
Ottawa.—Cuba has extended to Canada her minimum tariff, the government was advised. For the past two years the maximum tariff, double the minimum impost, has been applied to most of the goods entering that country from Canada.

Had Brilliant Career

Feodor Chaliapin, Celebrated Russian Singer, Dies in Paris

Paris.—Feodor Chaliapin, one time shoemaker's apprentice, whose magic voice carried him to world-wide operatic fame, died here at the age of 65. The celebrated Russian basso long had suffered from a kidney ailment and his condition became critical. Attending physicians said he was in a coma for several hours before his death and suffered little or no pain.

As far back as Chaliapin could remember—and he always was proud of his humble beginnings—he loved to sing. He sang the rich folk songs of his native land as a boy playing in the fields near his home, with his closest chum—Maxim Gorki, who later became one of the greatest Russian writers. Later he volunteered to sing in a choir and he sang so much at his work as a cobbler's apprentice for five cents per 18-hour day that he was discharged.

As Don Basilio in "The Barber of Seville," as Mephistopheles in "Faust," and Don Quixote and Ivan he carved for himself a lasting niche in the operatic hall of fame.

Meteorological Service

Forecasts For Aviators On The Trans-Canada Air Lines

Toronto.—John Patterson, head of the meteorological bureau, announced a 24-hour meteorological service will be ready when the Trans-Canada Air Lines extends its lines eastward.

"We are all set for a Trans-Canada service so far as the service from Winnipeg to Vancouver is concerned," said Mr. Patterson. "The stretch from Winnipeg to the east still requires some organization."

Weather stations for preparation of forecasts for aviators will be located at Vancouver, Lethbridge, Winnipeg, Toronto and Montreal, as well as the one now at Botwood, Newfoundland.

Children Fire Victims

Three Burned To Death When Flames Destroyed Farm Home

Providence, R.I.—Trapped in a two-story farm house which burst into flame when coal oil was used to light a fire, three children of Mr. and Mrs. Ernest Grise were burned to death at 7:40 a.m. Three other children were rescued by their mother, and four more escaped the tragedy by being away at mass. Mr. Grise is now at St. Hyacinthe, Que., where he is seeking work.

The three victims of the fire were Dolores, eight; Rolande, seven; and a baby, aged five months. Mrs. Grise saved Renee, nine; Bertland, five, and Armand, three.

Opposes Padlock Law

Vancouver.—The United Church presbytery of Vancouver, at a special meeting, placed itself on record as opposed to Quebec's "padlock law" and unanimously passed a resolution urging its amendment or repeal. The resolution, which will be forwarded to Hon. Ernest Lapointe, commended the federal minister of justice for "opening negotiations with the Quebec government to have the act, known as the padlock law, amended or repealed."

Espionage Charge

Washington.—Representative Scott (Democrat, California), told United States house of representatives, German, Italian and Japanese espionage agents were "working together" in the Panama Canal Zone. The Californian said he obtained his information from a magazine writer in whom he had great confidence. He did not name the writer.

Heads Blesley Team

Ottawa.—Lieut.-Col. J. D. Fraser, officer commanding the Princess Louise Dragoon Guards, Ottawa, will command the 1938 Canadian Blesley team, the Dominion of Canada Rifle Association announced. Captain W. Worrick of Winnipeg will be adjutant.

Pavilion Rebuilt

Glasgow.—Reduced to a pile of tangled timbers by a terrific gale early in February, the Canadian pavilion at the British Empire exhibition, Balaustation park, is rapidly nearing completion.

NEW FRENCH PREMIER

Following the fall of Premier Leon Blum of France, M. Daladier (above), War Minister, has been given the difficult task of forming a new Government. Finance was responsible for the defeat of the Blum Government in the French Chamber of Deputies.

Test Planes

New Trans-Canada Aircraft Said To Be Fastest On The Continent

Winnipeg.—Initial test flights of the first two of 10 Lockheed 14 monoplanes ordered by Trans-Canada Air Lines, will be made at Burbank, California, before members of T.C.A. personnel who will pilot the machines to Vancouver after satisfactory completion of the tests.

With a 250-mile-an-hour top speed and a cruising range of 220, the new Trans-Canada craft are classed among the fastest airplanes on the continent. They boast luxurious accommodation for 11 passengers, as well as space for the crew of three, and have cargo capacity of 2,700 pounds.

A fuel capacity of 584 gallons permits a cruising range of 1,575 miles from the two Pratt and Whitney motors. The wing span of 65 feet, six inches measures approximately 10 feet greater than that of the biplane in which pilots are now conducting experimental flights across western Canada. Forty-four feet, four inches is the overall length and the planes, fully loaded, will weigh 17,500 pounds.

Smuggling Plot

San Francisco.—Seven men were questioned as federal and California authorities investigated a smuggling plot in which \$40,000 worth of narcotics was landed in San Francisco from the United States navy transport Chaumont.

Air Raid, Precautions

London.—Obscure the lights, clear the loft, attic or top floor of all that might be set on fire by incendiary bombs are orders given by the government in a new air-raid precautions handbook.

DIVA GIVES EASTER BUNNY A RIDE

Sailing from New York for a concert tour of Europe, Lily Pons, opera and film star, carried with her a huge Easter bunny which she is taking to a little niece in France.

Japan Fears Russian Attack

Sending Best Troops To Guard Border Of Manchukuo

Tokyo.—The danger of conflict with Soviet Russia is increasingly claiming the attention of Japanese leaders and the public.

In informed quarters it was understood Japan recently moved some regular army units from China battlefronts to Manchukuo to man the border of Manchukuo and Korea. These forces have been estimated at between 300,000 and 350,000.

Many Japanese leaders have been described as advocates of an attack on Russia before the Soviet army could strike.

The foreign office spokesman expressed widespread feeling when he said in comment on alleged mistreatment of Japanese in Russian Sakhalin: "If Russia cares to aggravate the situation we will not hesitate to respond."

Tokyo newspapers gave prominence to a statement attributed to Marshal Vassily Bleucher, commander of the Soviet far eastern army, that: "Now is the time to fight Japan."

(Japanese and neutral military writers have agreed Japan's best divisions were not being sent to China but to northern Manchukuo. Recently there have been reports the Tokyo high command refused to send additional divisions from the home-land to reinforce the armies which have met reverses or been held to a stalemate in central China.)

Heavy Wheat Buying

May Indicate Britain Is Filling All Available Storage Space

London.—Continued heavy buying of wheat cargoes convinced dealers on the Baltic exchange that the British government has ordered leading millers to fill available storage space and maintain a three-month supply as a phase of national defence.

During a three-day period 30 cargoes totalling about 14,000,000 bushels were taken up by leading buyers. Normal buying is about six cargoes a week.

Priests, however, have not responded in full measure to such large transactions, rising only by the equivalent of six cents a bushel. This perhaps resulted from the fact that most of the buying was confined to one miller and spread over numerous positions.

Official confirmation of a government hand in the buying was lacking, but dealers believed an official statement would be forthcoming shortly.

Anglo-American Trade Pact

Birmingham, England.—The new Anglo-American commercial accord will be a "trade agreement pure and simple" and not a "political rapprochement meaning a sacrifice by any British industry," Captain Evan Wallace, parliamentary secretary to the Board of Trade, declared in a speech.

JAPANESE ARE ON THE DEFENSIVE ON A WIDE FRONT

Shanghai.—Foreign military observers believe the Japanese are in an extremely difficult military position in South Shantung province, in South Shantung province, attacks have put the Japanese on the defensive along the 150-mile battlefront.

Continuing their aggressive tactics, the Chinese said they had taken Chufu. Chinese said they would the walls of Chufu and engaged the Japanese in hand-to-hand combat.

The Chinese said they occupied hills surrounding Yihien, on a spur line east of the Tientsin-Pukow railway, in a night attack and were engaging the Japanese defenders of that city in a sanguinary battle. Centre of fighting shifted to Yihien, according to the Chinese, after they drove the Japanese from Taiherchwang, 25 miles to the southeast.

Reinforcements by thousands were being rushed into the Shantung zone by Japanese in effort to repel the Chinese offensive.

There was every indication the Chinese, while hammering mercilessly at the Japanese all along the line, do not intend to meet the reinforced Japanese armies in the middle of Shantung province.

They plan instead to keep the conflict on their own chosen ground in the southern part of the province, where the Japanese will have to use extensive supply and communication lines, always in danger of being cut by guerrilla raiders.

The vanguard of Japanese reinforcements sent from Tientsin already have met Chinese in a series of spirited engagements about 40 miles west of Taiherchwang, where Chinese have claimed victory.

While fresh Japanese troops sped from the north, the seriousness of the situation was emphasized by departure of nearly a division of Japanese forces from Shanghai by sea, presumably for Tientsin.

Would Better Conditions

Business Men Advised To Take More Interest In Public Affairs

Vancouver.—Business men were urged to take a greater interest in public affairs by Erick F. Willis, leader of the Conservative opposition in the Manitoba legislature, when he addressed a dinner of the Vancouver junior board of trade.

The more interest they took, he said, "the better the conditions and legislation that will result."

"This will be followed by less expenditures and waste, which automatically will be reflected in less taxation."

The business man should know his political representatives, Mr. Willis continued, for only by such knowledge could he gauge the probable actions of those to whom he had delegated the authority to govern.

Apathy In Government

Says Time Has Come For More Aggressive Action

London, Ont.—A. R. Mosher, president of the Air-Canada Congress of Labor, told the eighth annual convention banquet the congress is "not attacking the government, it is attacking the system and the apathy of the government."

The time "has come for more progressive action to remove those things that stand in the way of a more abundant life for all," Mr. Mosher said.

He denied news reports the executive board of congress is urging political action.

R.C.M.P. Changes

Ottawa.—Superintendent V. A. M. Kemp, adjutant at Royal Canadian Mounted Police headquarters here, will be transferred to Saskatoon to take charge of the academy there, it was announced. He will relieve Superintendent W. Munday, who will be transferred to another post not yet selected. Several other changes in the R.C.M.P. staff were announced.

Facts About Hospital Costs.

Statistics from Canadian hospitals reveal that it costs on the average in Canada \$5.01 per day for a private room, \$2.79 for a semi-private room, and \$1.98 in a public ward. These figures prevail in the average Canadian centre.

From the amount of revenue thus received one might imagine that the hospitals should be paying institutions.

On the debit side of the ledger, however, is the cost of the patient per day. This amounts to \$3.28 for all patients, so that there is a deficit shown with the exception of private room revenue.

It might be stated that the charge for other services might be increased, but anyone entering a hospital for any length of time finds the prevailing rate sufficiently high.

While conditions in the business world may vary, the hospital rates are fairly constant. In the past 12 years they have shown an increase of only 3.6 p.c.—Municipal World.

Must Keep Up the Pressure.

If you toot your tooter and throw away your horn, there's not a soul in a few short days who'll know that you were born.

The man who gathers pumpkins is the man who plows all day, and the man who keeps a-humping is the man who makes it pay.

He who advertises with a short and sudden jerk is the man who puts the blame on the publisher because it didn't work.

The gent who gets the business has a long and steady pull, and keeps his local paper for years quite full.

He plans his advertising in a thoughtful, honest way, and he keeps himself right at it until he makes it pay.

He has faith in all the future; can stand a sudden shock, and, like the man in Scripture, has his business on a rock.

Spruce Grove Baseball Club.

Good Music!

For Greater Safety on the Roads.

Greater safety on the highways is the objective of legislation passed at the session of the Alberta Legislature recently prorogued.

New provisions contained in amendments to the Vehicles and Highway Traffic Act are of special interest to the motoring public.

One important new provision requires vehicles to come to a stop at a point not less than 10 from a main highway, when about to enter upon such highway. This will have the effect of checking the number of accidents in this province in recent years, when the traffic volume on the main highways has been on the increase.

Special attention is being drawn to another requirement, which is that when a school van stops to take on or discharge passengers, no motor vehicle shall pass until all van passengers are clear of the path of the vehicle.

The Chances for a Good Crop.

Thruout the Stony Plain district, and the adjoining districts, moisture conditions at present appear to be quite favorable. In fact, reports from all parts of the province are that recent snows and rainfall augur well for seedling under favorable conditions for growth. The sloughs and small lakes have more water than usual in them at this time of year, and the grain fields are reported as being moisture laden.

A few timely snows during the growing season should put the crop over, barring hail storms and other unforeseen acts.

Judging from the signs, this district will probably have a larger crop than in ordinary years, and as usual hope is revived in the Spring as farmers get ready to go out to sow.

Stony Plain and District.

Among those who visited in Stony over the week-end were Mr. and Mrs. Wm. Comisarow, Viking; Mrs. Flo Goebel, Westlock; Miss Matilda Eaders, Miss Saunders Everitt, Mr. Bert Becker, Edmonton.

Miss Emma Fischer made a motor trip to Ponoka on the holiday.

Mr. and Mrs. A. P. Anderson spent the holidays with friends at Wetaakiwin.

Mr. Albert Wndel was receiving the congratulations of his friends yesterday, it being the 20th anniversary of his natal day.

J. H. McCarthy, representing the express department of the Canadian National Ry., paid Stony a visit Monday, interviewing merchants regarding the service given by the express department.

Mr. Percy T. Davidson has been appointed agent for the Giant Farm Power Plant, which uses free wind power. Mr. Davidson represents Stony Plain and district.

The officers and members of Meridian Lodge No. 129 are holding a dance in Kelly's Hall on the evening of Friday April 29th.

BUTTER AND EGGS WANTED at The Royal Cafe.

Spruce Grove News.

The Spruce Grove baseball club will stage a dance in the Grove on the evening of Friday, April 22. An Edmonton orchestra will play.

Pastor, Kurling held service on Friday morning in Peace Lutheran church.

Spruce Grove was well represented at the play and dance given on Monday night up at Stony by the S. P. girl basketballers.

The baseball boys are highly elated with the results from their membership drive. A prominent Edmonton sportsman took ten. The first hundred tickets were sold by Monday, and an order given the printer for more.

That Tax on Farm Produce.

The seven per cent tax on farm produce, proposed by the Provincial Government, is being very strongly objected to by farmers thruout the province. However, the bill will not be proclaimed until the Supreme Court has passed on its validity. Hence it looks like some more time-killing at the expense of the people of the province," comments an exchange.

Commendable Publicity.

Voicing a strong warning to dangerous drivers, The Globe and Mail, Toronto, in recent issues has boldly displayed the Sixth Commandment: "Thou shalt not kill; Drive Carefully!" Without doubt, but for the excellent support of the public press in giving prominence to the Safety First movement, the dreadful toll of lives taken on our highways and roads would be far greater.—Windsor Star.

Chicago Institute of Diesel Engineering.

We are selecting a few mechanically inclined men to take a training in Diesel Engineering. Excellent opportunities for those who can qualify themselves to enter this fast-growing field. We will be pleased to forward information to those interested. Write stating age to Box 248, Calgary, Alta.

Think This One Over.

"I have often wondered what the unthrifty people are going to do after the thrifty people have exhausted their funds."—G. E. Wood, M. P. (Brant, Ontario) from Hansard.

Where the Clock was Found.

Enid (a bride) was showing uncle over their new home.

"This is my room, Uncle. You see we have twin beds; they are so much more hygienic. That's Harold's; this one is mine."

Then Uncle noticed a blue enamel clock on the mantel shelf and remarked "What a charming little clock."

"Yes," said Enid, "it's a wedding present from Aunt Fanny."

A few days later Uncle received a note from Enid, telling how the blue enamel clock had disappeared the very afternoon he was there and could he throw any light on the matter?

Uncle replied: "Dear Enid, look in Harold's bed."
